Every day, after the rains, a non-descript creature, two feet long, comes to the surface, and, with its head and tail, without feet, like an eel's, eyes translucent behind, and its head and tail like a turtle's, it dips into the water, and then, which is a

COMMERCIAL INTELLIGENCE.

(MOSCOW, THURSDAY EVENING.)

We had about ten minutes for our monthly duty call, as for usual speculative transactions. The drug market here remains at \$560 to \$580 per ton; large loads are however firm for the present, and the greater portion of the drug is under higher limits, of \$555 to \$590 a chest, which if strictly followed, the prices cannot fall further.

The following are the ruling prices for opium and cretina:

Siam 700 to 800*s*, and \$555 on time, due about the 29th inst.; \$474 for the 7th inst.; New Beasars 500 to 600*s*; Old Bencoes 500*s* quoted; Malacca, \$225 to \$630.

There is nothing new to report to-day in the markets excepting some small fluctuations, all being at almost a complete standstill. Few sales are reported below, beyond what no transactions have transpired. There has been nothing doing in London.

This image is a high-contrast, black and white scan of a document page. It features a prominent vertical strip of light on the left side, which appears to be the edge of the page or a binding. The rest of the image is predominantly black, with some vertical streaks and noise, suggesting a poor quality scan or a very dark original document. No text or other graphical elements are discernible.

This image shows a vertical strip of dark, textured material, likely a book cover or binding, against a light background. The dark strip has a rough, fibrous texture and runs vertically down the center of the frame. The background is light and speckled with small dark spots. The overall appearance is that of a high-contrast, black and white photograph of a physical object.
